

WIDE-SCALE USE OF NATURAL GAS

Services that can use natural gas

1 RESIDENTIAL

Homes, buildings, condos, multi-family houses.

2 BUSINESS

Hotels, restaurants, hospitals, etc.

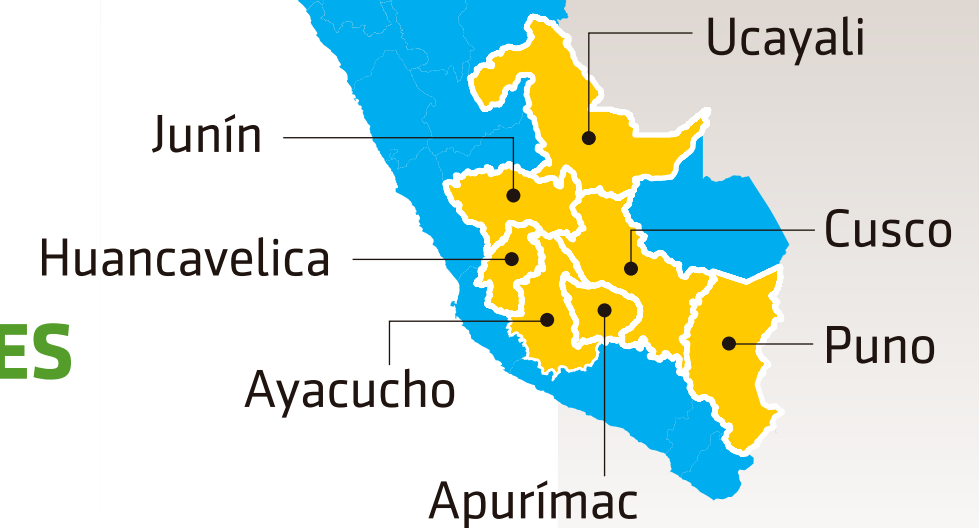

4 INDUSTRY

Factories, refineries, logging companies, agriculture, etc.

3 TRANSPORT

Public and rural transport (buses and all kind of cars)
Diesel engines for trucks, heavy machinery, tankers, compactors, railways, etc.

REGIONS WHERE THE SERVICES WILL BE PROVIDED

FISE will financed the residential connection cost.

The project includes the first gas acces.

WHAT BENEFITS WILL IT BRING?

Permanent gas supply due to direct connection to the pipelines.

Ecological alternative to replace fuel such as LPG, Gasoline, residual 500,diesel, carbon.

Monthly savings for the lowest cost of fuel.

Less health problems (better combustion and less polluting gases).

The service is paid after use (monthly bill for consumption).

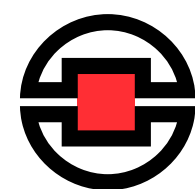

Support from the State because the home connections to natural gas will be financed by the FISE.
