

Better connectivity for all Peruvians

and greater competitiveness of the country

PROINVERSION on behalf of the Ministry of Transport and Communications promotes the concession of **AWS-3 and 2.3 GHz radio spectrum bands** under the modality of Project in Assets. This project will allow to expand and improve access to mobile services in urban and rural areas of Peru.

Benefits in communities where mobile telephony and mobile internet are not available

+ 300,000

new beneficiaries in rural areas

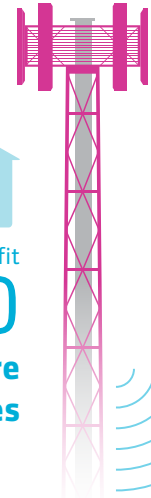

Access

to information

and improvement of the quality of their communication networks. Provision of distance education and telemedicine services which are vital for citizens.

2.3 GHz
BAND

It will benefit **390** or more rural communities

Bands to be granted under concession nationwide

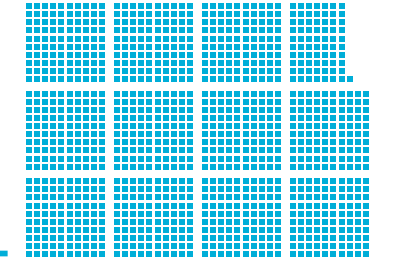

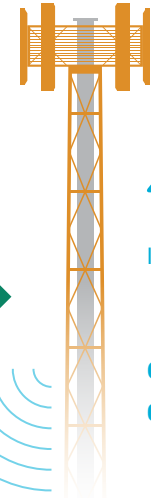

It will allow to increase the capacity and quality of 4G mobile services, particularly in the most densely-populated areas of the country, allowing the expected significant growth in data traffic.

INVESTMENT COMMITMENTS IN RURAL AREAS

The successful bidders will deploy a mobile telecommunications network for **rural communities throughout the Peruvian territory.**

AWS-3
BAND

It will benefit **1,171** or more rural communities

At least **118** of them will be located in the Valley of the Apurímac, Ene and Mantaro rivers, as well as in the Peruvian rainforest.
